

# Worlds Apart

Teleport Games are Excited to present; **WORLDS APART!**

An ingenious game of strategy, where players must battle other worlds to complete their objective whilst keeping hold of worlds they may already have gained. This will help prevent other players obtaining their objective first.

Each player has a different objective in the same game.

Use the Teleport stations to move to other world for completion of your objective.

A failed attempt at Teleporting to another world will result in what we call the teleport loop being activated!!!

The game consists of 9 worlds and each world contains 4 territories. A typical objective is conquering 4 of the worlds and all the territories as shown on the objective cards.

All Objective cards overlap each other, thus the need for strategy and planning during this game.

This is both a card and dice use game.
